《基于L4驾驶模式下的智能座舱情感体验与多模态交互设计》

Intelligent Cockpit Emotional Experience and Multimodal Interaction Design Based on L4 Driving Mode

随着人们出行体验需求的不断提高和汽车智能化技术的不断突破，L4级及以上自动驾驶汽车即将开启出行体验新时代。由于汽车正在成为我们的“第三空间”，因此智能座舱应该传递给乘客更具亲和，温馨以及特定情感需求的驾驶感受。

本项目通过文献调研拆解车内情感体验和人机交互，针对家用汽车使用需求提出设计方案。

With the intelligentization of automobiles, they are becoming our "third space", so the intelligent cockpit should convey to passengers a driving experience that is more friendly, warm, and specific emotional needs.

This project decomposes the emotional experience and human-computer interaction inside the car through literature research, and proposes a design scheme for the use needs of household cars.

"L4驾驶模式"通常指的是自动驾驶技术中的第四级别。车辆能够在特定环境下实现完全自动化的驾驶，而驾驶员无需持续监控。

"L4 driving mode" usually refers to the fourth level of autonomous driving technology. Vehicles can achieve fully automated driving in specific environments without the need for continuous monitoring by drivers.

L4 Level

核心家庭成为主要的家庭形式，尽管家庭规模较小，但核心家庭对汽车的功能性和智能化特性的需求可能增加。

The nuclear family has become the main form of family, and although the family size is small, the demand for the functionality and intelligent features of cars in nuclear families may increase.

Date

家庭出行现状

目前，我国核心家庭占比70%，家庭式汽车需求量不断增加，人们更加追求乘车时候的情感体验和家庭交流，用户需要的不只是内饰造型,而是在汽车内饰中获得的用户体验和情感价值人车交互，人与人的交互。

At present, core families account for 70% of China's total, and the demand for family cars is constantly increasing. People are more pursuing emotional experiences and family communication when riding.

经数据统计得知，我国城市居民中，家庭平均出行次数2.6次。
the average number of trips per household among urban residents in China is 2.6.

家庭出行的主要需求：接送孩子，度假野炊，购物以及其他活动。
The main needs for family travel include picking up and dropping off children, vacationing for picnics, shopping, and other activities.
