

外观展示 Appearance

- 流线型设计：

整车外观采用流线型设计，降低风阻。优化车身曲线，减少空气阻力，提高行驶稳定性。

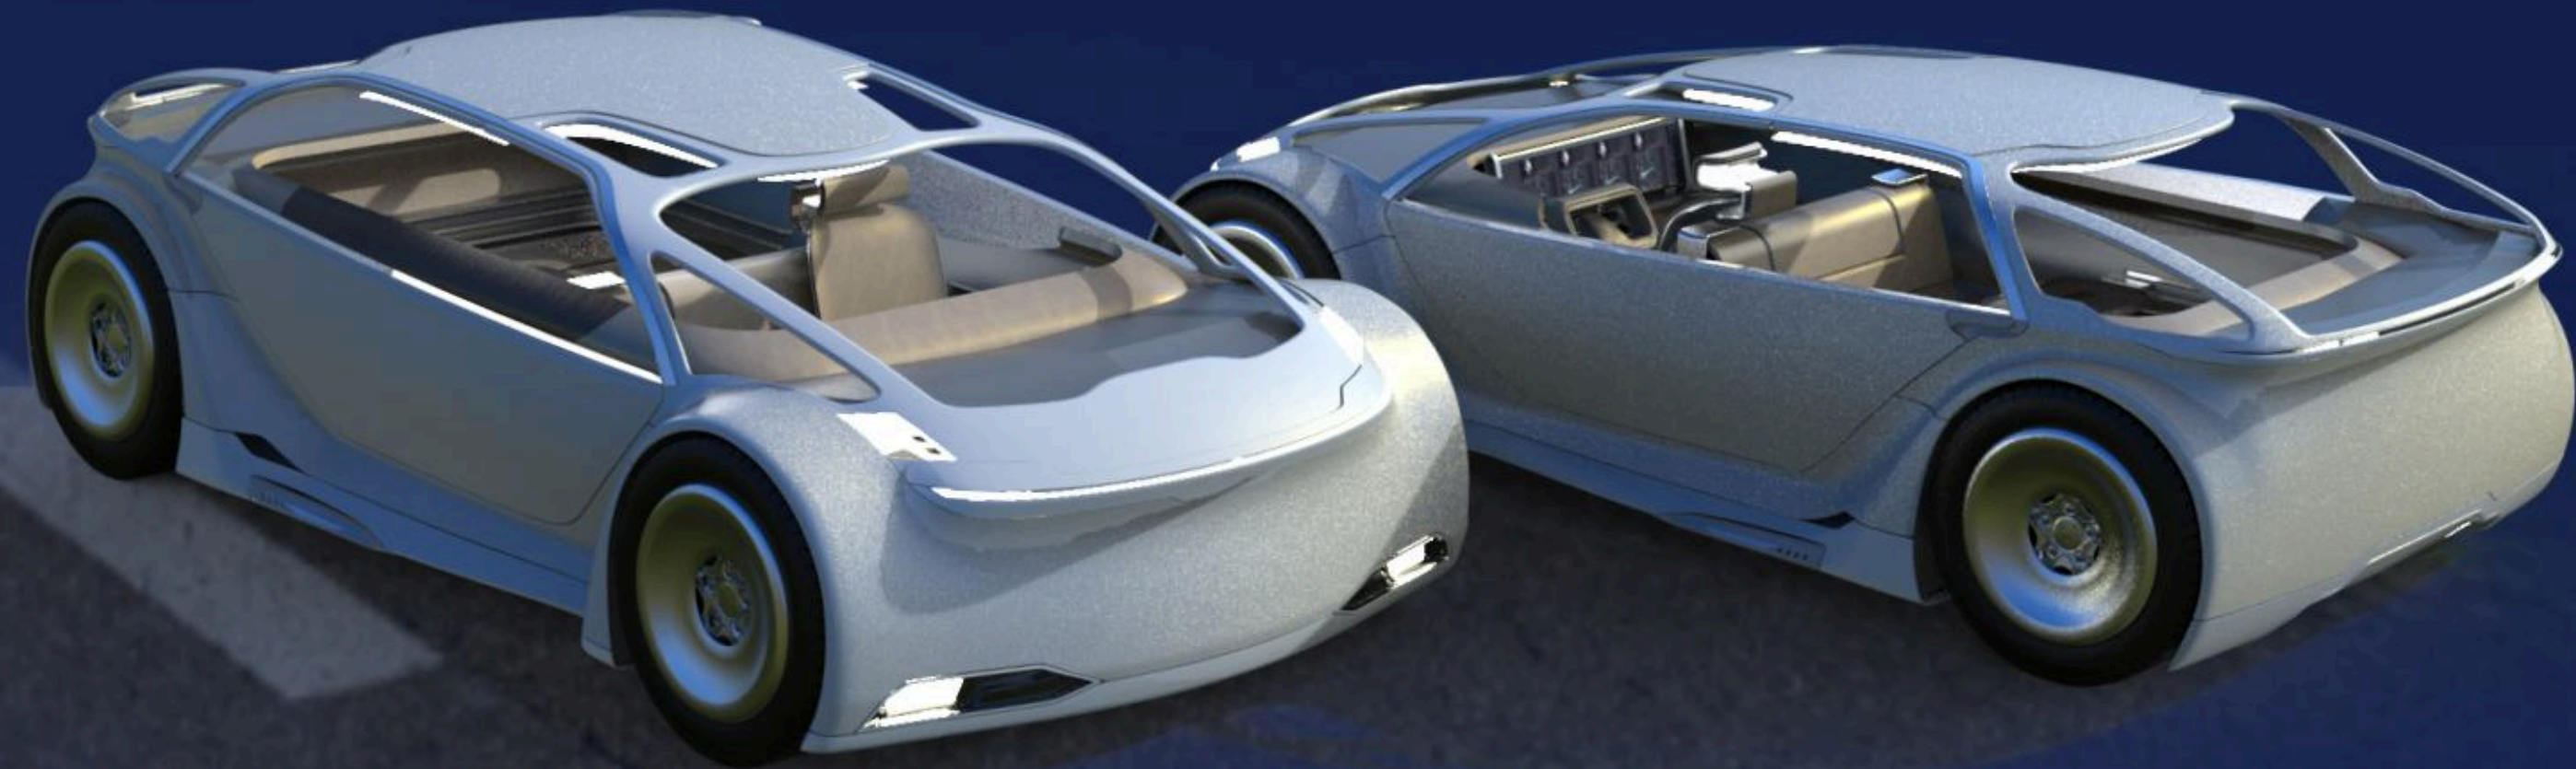

The overall appearance of the vehicle adopts a streamlined design to reduce wind resistance. Optimize the body curve, reduce air resistance, and improve driving stability.

- 节能环保：

采用先进的动力系统，提高能源利用效率，减少尾气排放。

Adopting advanced power systems to improve energy efficiency and reduce exhaust emissions

场景图 Scene

(1) 布局变换的内舱。移动座舱设计在技术的发展下演变，今后的内饰空间朝着更加多元可变的工程布局风格方式上进行发展。

(2) 构建生活空间场景。由于汽车正在成为我们的“第三空间”，因此，生活化的场景会越来越多的融入到内饰中。

(1) The interior compartment of the layout transformation: The design of mobile cabins has evolved with the development of technology, and in the future, the interior space will develop towards more diverse and variable engineering layout styles.

(2) Build a living space scene. As cars are becoming our **third space**, more and more everyday scenes will be integrated into the interior.
