

观影模式 Viewing Mode

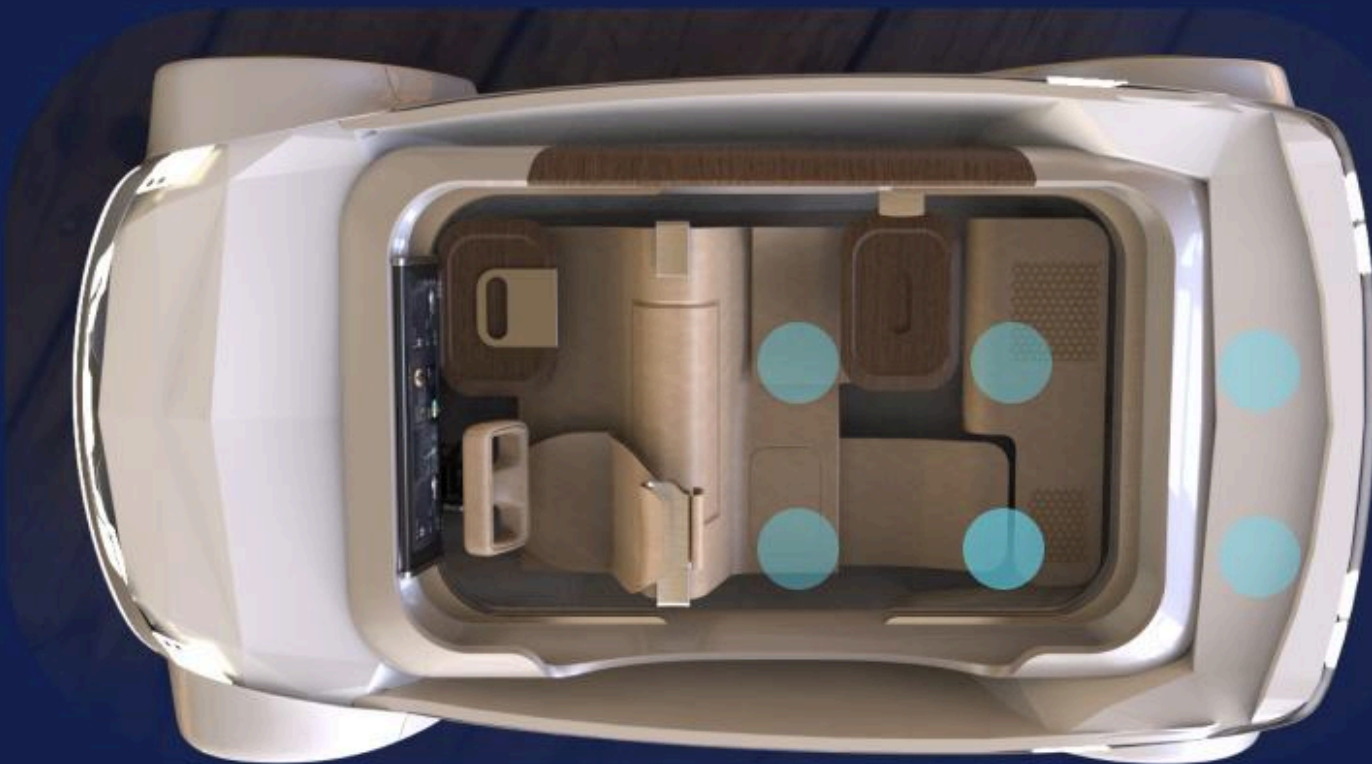

观影模式设计说明：

- 观影模式是家用汽车座舱的一项创新设计，旨在提供乘客在行驶过程中的高品质娱乐体验。
- The viewing mode is an innovative design of the cabin of a family car, aimed at providing passengers with a high-quality entertainment experience while driving.
- 显示系统：配备高分辨率的液晶显示屏，确保清晰、生动的画面呈现。显示屏的位置和角度精心设计，使所有乘客享受观影乐趣。
- Display System: Equipped with a high-resolution LCD display screen, ensuring clear and vivid image presentation. The position and angle of the display screen have been carefully designed to allow all passengers to enjoy watching movies.
- 座椅布局：座椅布局注重乘客的视野和舒适度。座椅采用可旋转、可调节的设计，确保每位乘客获得最佳的观影角度，而且在观影时能够更好地支撑身体。
- Seat layout: The seat layout emphasizes the passenger's visibility and comfort. The seats are designed to be rotatable and adjustable, ensuring that each passenger has the best viewing angle and can better support their body.
- 声音系统：内置先进音响系统，环绕立体声音效，为观影模式提供身临其境体验，支持蓝牙连接，方便乘客使用个人音频设备。
- Sound System: Equipped with advanced sound system and surround sound effects, providing an immersive audio experience for the viewing mode. Supports Bluetooth connection, making it convenient for passengers to use their personal audio devices.

办公模式 Office Mode

使用方式

- 座椅和工作台设计：采用可调节、折叠的座椅和工作台设计，可调整座椅高度、角度以及工作台的位置，确保舒适的工作姿势。
- Seat and Workbench Design: Adopting adjustable and foldable seat and workbench design, the seat height, angle, and workbench position can be adjusted to ensure a comfortable working posture.
- 基于多媒体的办公设备：内置电源插座、USB接口和无线充电装置，方便连接和供电移动办公设备。
- Multimedia based office equipment: equipped with a built-in power socket, USB interface, and wireless charging device, making it easy to connect and power mobile office equipment.
- 人机交互系统：配备语音识别和手势控制技术，使驾驶者可以安全地操控办公模式的各项功能，而不分散驾驶注意力。
- Human computer interaction system: equipped with speech recognition and gesture control technology, allowing drivers to safely control various functions of office mode without distracting their driving attention.
